Subject: Receipt of Penalty Assessment, Decorative Landscape Cessation Order
MC-2005-03-02-01, S/035/023, Salt Lake County, Utah

Dear Mr. Burnham:

This letter serves as acknowledgment that we have received your \$198.00 penalty assessment fine. This now completes the action taken for the Cessation Order #MC-2005-03-02-01.

Thank you for resolving this situation in such a timely manner.

Sincerely,

Daron R. Haddock
Assessment Officer/Permit Supervisor

MEMORANDUM

TO: Daron Haddock
FROM: Bryce Tripp
DATE: 04/07/2005
SUBJECT: Geologic setting of Bluffdale mineral extraction operations.

RECEIVED

APR - 8 2005

DIV OF OIL GAS & MINING

At the request of the Utah Division of Oil, Gas and Mining (DOGM), I accompanied DOGM inspectors to the Bluffdale operations to provide a second opinion about the geologic nature of the material being mined. A brief description of the field investigation and my observations follows:

Bluffdale Excavations – On March 15, 2005, I accompanied you and Paul Baker to examine four current operations in section 16, 17, 20-22, 27-28, T. 4 S., R. 1 W. on the Jordan Narrows 7.5' topographic map. The geology of this site consists of widely distributed Tertiary volcanic bedrock outcrops exposed on hill crests and ridges, mantled by a fairly thin veneer of Pleistocene lake shore deposits of Lake Bonneville (Biek, 2003). These excavations are near the Bonneville shoreline level which is often an important sand and gravel unit along the Wasatch Front, but in this area, the lacustrine beds consist of a large amount of Tertiary volcanic cobbles, boulders, and pebbles in a mixture of mostly Pleistocene lacustrine silt and sand with no visible, well developed gravels. I examined the material at several excavation sites, including where a trackhoe had excavated an 8-foot-deep hole, and saw nothing that remotely resembled a sand and gravel deposit. Also there were many trackhoes operating but no sand and gravel washing and screening equipment was on site. The geologic setting, mining and processing methods, and information from several of the workers at the sites characterize these operations as removing and selling volcanic boulders for landscape use, in preparation for post-mining real estate development of the land.

Reference – Biek, R.F., 2003, Interim geologic map of the Jordan Narrows quadrangle, Salt Lake and Utah Counties, Utah: Utah Geological Survey Open-File Report 415, scale 1:24,000.

---ooOoo---

IN THE MATTER OF THE STOP
WORK CONFERENCE FOR
DECORATIVE LANDSCAPING
UNPERMITTED SITE

:

NOTICE OF STOP WORK
CONFERENCE

:

CAUSE NO. M/035/023

:

---ooOoo---

THE STATE OF UTAH TO ALL PERSONS INTERESTED IN THE ABOVE
ENTITLED MATTER.

Notice is hereby given that the Division of Oil, Gas and Mining ("Division") will conduct a stop work conference on March 21, 2005 beginning at 3:00 p.m., at the Decorative Landscaping, M/035/023, Unpermitted Site, Bluffdale, Utah.

The stop work conference will be conducted in accordance with the Mineral Regulatory Program Inspection and Enforcement Rules R647-6-102.4.

Persons interested in this matter may participate pursuant to R647-6-102.4.

Pursuant to the Americans with Disabilities Act, persons requiring auxiliary communicative aids and services to enable them to participate in this conference should call Vickie Southwick at 538-5304, at least three working days prior to the hearing date.

DATED this 18th day of March 2005.
